

Smartly Dressed

. . . DESPITE THE WAR

Of the many problems caused by the War with its coupons and train of rising prices, not least is that of keeping up one's appearance. Clothes are daily becoming scarcer and more expensive. Before ordering new clothes, however, you should ask yourself this question : are the old ones really "done," or is it that they are only tired and dispirited? In the latter case the remedy is Dry-cleaning and Tailor-pressing by the Lilliput Special Valet Service, which will restore smartness and youth to your clothes at a mere fraction of the cost of new ones. This service will ensure your being perfectly dressed despite the War!

*Invisible Mending and Tailor Repairs executed

Trade
Mark

'METYCAINE'

Brand

**Gamma-(2-Methyl Piperidino)-Propyl Benzoate
Hydrochloride.**

A local anaesthetic effective by topical and infiltrative application.

'Metycaine' has in general the same compatibilities and incompatibilities as cocaine and procaine.

The toxicity is less than that of cocaine and is comparable to that of procaine.

It does not alone blanch tissues, but may be combined with adrenaline and ephedrine for this effect.

It produces prompt, diffusible and profound anaesthesia. Its effects are obtained either by infiltration or by topical application to mucous membrane and similar surfaces.

At the heart of an industry

The primary function of our Medical Information Department, as its name denotes, is to supply information to the medical profession.

In the course of time these duties have resulted in the collation of a large amount of valuable material, published and unpublished, housed in our library at Dagenham. The personnel of the Department is in close contact with clinicians throughout the British Empire and with research chemists, pharmacologists, bacteriologists, etc., actively engaged in the investigation and development of new drugs.

The purpose of this announcement is to remind the medical profession that our Medical Information Department is always at its service to deal with inquiries on our products and on allied topics.

MAY & BAKER LTD.

Solutions of MILTON indicated in the ENVELOPE IRRIGATION TREATMENT

FOR INITIAL CLEANSING 20%

a 20% solution of *Milton* is used :

- (1) because it is sufficiently hypertonic to inaugurate effective transudation without excessive tissue dehydration.
- (2) because at this concentration its action on the exudates and necrotic tissue promotes thorough cleansing of the wound.
- (3) because its germicidal power is adequate for the control of infection, when present.
- (4) because at this concentration the cleansing action is of great supplementary value to any surgical débridement which may be necessary. Where involvement is extensive, or with the hypersensitive patient, initial cleansing may be carried out simultaneously with the débridement under light general anæsthesia.

The 20% solution of *Milton* also appears to increase the tolerance of the sensitive patient to subsequent routine irrigations with 5% *Milton*.

FOR ROUTINE IRRIGATIONS 5%

a 5% solution of *Milton* is used :

- (1) because it is isotonic and, therefore, causes neither transudation nor maceration *provided proper attention is paid to the drainage of the envelope and the drying of the limb after irrigation is completed.*
- (2) because its strength is sufficient to cleanse the wound without impeding the normal healing of the tissues.
- (3) because at this concentration its germicidal power also is adequate for the continued control of infection.

*MILTON, the stable brand of Electrolytic Sodium
Hypochlorite, non-caustic and of standard strength*

COOMBE LYING-IN HOSPITAL DUBLIN

FOUNDED 1826

THIS Hospital affords a unique opportunity to Students of Obstetrics, to take their practical Midwifery cases, within the Hospital as well as on the large district surrounding the Hospital.

Students can reside in the Hospital. On entering the Hospital the Student takes two cases in the Labour Ward under supervision, and subsequently conducts his cases, eighteen to twenty, on the district.

The number of cases delivered through the Hospital services during the year 1942 amounted to 3,312.

Lectures are delivered by the Master—daily. Clinical demonstrations and examination of cases on three afternoons weekly.

A GYNÆCOLOGICAL DISPENSARY with examination of cases is held twice weekly—open to residents. Operations are performed daily by the Master. There is also a lecture and demonstration in *Pædiatrics* once weekly.

Every facility is given to Post Graduates to obtain a very full knowledge of *Obstetrics* and *Gynæcology*.

FOR FURTHER INFORMATION AS TO FEES, ETC.,
APPLICATION SHOULD BE MADE TO THE MASTER,
DR. EDWARD A. KEELAN, M.A.O., F.R.C.P.I., OR,
THE REGISTRAR AT THE HOSPITAL.

ESOBAN

O I N T M E N T

EMULSION and CAPSULES

FOR DERMATITIS, ECZEMA and ALLIED SKIN DISEASES

It has been shown that many skin diseases are accompanied by a deficiency of the unsaturated fatty acids in the body fat and that when this is restored to normal, the condition rapidly clears. The ESOBAN treatment provides the essential unsaturated fatty acids necessary for normal skin metabolism together with an antiseptic for the prevention of secondary infection

ESOBAN OINTMENT

is of the water-in-oil emulsion type and contains 66.6% of maize oil combined with para-chlormetaxlenol or zinc oxide, according to the type of skin complaint to be treated

ESOBAN EMULSION

presents maize oil in an easy assimilable form for oral use. For use in conjunction with the ointment in longstanding or intractable cases

ESOBAN CAPSULES

Contain pure maize oil and are indicated where the emulsion is not well tolerated or its administration difficult

Prescription Priority

In order that Ribena, rich source of natural vitamin C, shall be available for those who need it most, the Ministry of Food have ruled that supplies must be reserved for

Medical Prescriptions

Young Children

Expectant & Nursing Mothers

Because Ribena provides vitamin C in natural form, with its inherent accessory factors, and because it is so generally acceptable and well tolerated in all cases of vitamin C deficiency, doctors are recommending it increasingly in cases of internal ulceration, during pregnancy and

lactation, and for children whose vitamin C intake is lowered by digestive disturbance or dietary dislikes.

In these and other cases for which a natural vitamin C supplement is indicated, it is helpful to provide a written prescription for Ribena so that the patient has priority with the local chemist, who should be able to supply.

Do you know the Laundry offers you
**HOSPITAL CLEANLINESS
FOR YOUR CLOTHES**

Whether your visits to the Hospitals are occasional or are in the nature of regular attendances, you must have been impressed by the immaculate cleanliness of the large quantities of bed clothes, towels, and other washables, as well as the wearing apparel of the medical staffs in these great modern establishments. It may not have occurred to you that you may have in your own home the same degree of cleanliness that obtains in Hospitals by sending your Clothes for Washing to an up-to-date Laundry such as DEVONSHIRE; here the same specialized methods of washing are used, the same advanced equipment and the same expert care, with the same result hospital cleanliness.

*For perfect cleanliness see
that your Clothes are sent to*
